

# Unite the people

Let's connect

Meetings, gatherings and events are becoming more interactive than before and require the necessary equipment to ensure that everyone hears and is being heard clearly. **Unite** is a **Digital Wireless Communication System** designed to allow people to effortlessly speak, listen and interact with each other.

With the unique combination of transmitters, receivers, an access point and all necessary accessories, Unite is the best-in-class wireless communication system. The system is applicable for tour guides in both corporate and tourism industries, and language distribution during multi-lingual meetings. Unite can also be seamlessly applied to other applications such as wireless presentations or within the education sector.

## UNITE TP & TH

The Unite TP bodypack and Unite TH handheld microphone can be used as the **transmitters** within the Unite system. With the integrated DSP, these transmitters ensure the best audio quality even in noisy environments such as factories or busy cities. Additionally with the wide variety of interface capabilities, integrating external audio sources and enhancing your presentation becomes very easy.

## UNITE RP & RP-T

The Unite RP **bodypack receiver** comes in a light-weight and compact design and allows the user to select the correct channel and listen in on the conversation.

The Unite RP-T expands on the Unite RP with the **talkback functionality**. With a simple press of the button, participants can join the discussion and ask questions.

## UNITE AP4

The Unite AP4 access point allows for the integration of the Unite communication system into a larger AV solution.

This **access point** can function as a **transmitter**, capable of sending out 4 separate channels or can function as a **receiver** where 4 wireless microphones can be connected. 8 AP4 units can be connected bringing the total maximum channels to 32.

## UNITE & DECT

Unite uses the Digital Enhanced Cordless Telecommunication or DECT standard which is a future-proof, license-free wireless transmission platform uniquely suitable for high-quality audio communications. Unite allows up to 3 people to speak simultaneously in a group and 32 groups can operate in parallel. All communications are encrypted by AES-256 ensuring confidentiality during all interactions.

### **Unite as tour guiding system**

Whether it's during a scenic tour in a historical city or when showing a group the newest factory in a corporation, tour guides need a high-quality wireless communication system like Unite to bring their story alive.

- + Present with multiple speakers and allow talk-back from guests
- + Best-in-class audio quality and reduced noise by internal DSP processing
- + Bring in external audio sources via line-in, Bluetooth or USB for a better tour experience

### **Unite as language distribution system**

As the world evolves towards being more multi-cultural and multi-lingual, it's more important than ever that people can hear and be heard in their own language.

- + Distribute 4 languages per access point and up to 32 by combining devices
- + Easy channel selection on receivers
- + Compatible with Televic interpretation equipment

### **Unite as the perfect solution for your Rental events**

Unite is not only a perfect solution for tour guides or language distribution, but can also be used in other applications such as wireless presenting, intercom, team collaboration or within education. This versatility and feature set makes Unite the ideal system for **rental companies**. Within this rental world, having one system that covers many use cases reduces cost and improves the stock management. This is significantly enhanced by the **Televic Conference Rental Alliance**, a collaborative organization comprising market-leading rental companies. The alliance is dedicated to fostering knowledge exchange among its members and facilitating dry-hiring, thereby enabling seamless sharing and rental of their inventory among alliance members.
